

DATA SCIENCE MASTER VIRTUAL INTERNSHIP

Internship Presentation

Kushagra Pratap Singh

Roll No.: 2410030890 | Section: 2CSE15

B.Tech Computer Science and Engineering • 3rd Year • Batch 2024–28

IILM University, Greater Noida, U.P.

June 2026 – August 2026 • 8 Weeks • Virtual

Internship Overview

- Organized by EduSkills and supported by Siemens Industry Software (India) Pvt. Ltd.
- Conducted in collaboration with AICTE, Ministry of Education.
- Duration: 8 weeks, from June 2026 to August 2026.
- Mode: Virtual learning experience with structured modules and assessments.
- Domain: Data Science Master, covering data, machine learning, deployment, and platform administration.

About the Organizations

EduSkills

Organizer and learning-coordination body for the internship.

Siemens Industry Software (India) Pvt. Ltd.

Supporting organization connecting the framework with enterprise-oriented AI and data-science practices.

AICTE, Ministry of Education

Collaborating body within the stated internship framework.

Key people associated with the program

Gaurav Pai

Head, Strategy and Operations, Siemens Industry Software (India) Pvt. Ltd.

Dr. Buddha Chandrasekhar

Chief Coordinating Officer (CCO), AICTE, Ministry of Education

Shubhajit Jagadev

Chief Executive Officer (CEO), EduSkills

Problem Statement

- There is a gap between subject-wise academic learning and integrated industry practice.
- Students may study programming, databases, statistics, AI, and ML separately without seeing the complete workflow.
- A data-science solution requires more than model training: it begins with a meaningful business or organizational problem.
- The lifecycle also requires data access, transformation, preparation, evaluation, deployment, and monitoring.
- Industry-oriented exposure is therefore needed to connect analytical skills with enterprise platform operations.

Objectives

- Identify business and organizational problems that are suitable for AI and machine learning.
- Develop competence in accessing, loading, transforming, and calculating data.
- Build machine-learning knowledge through foundational and advanced modules.
- Strengthen advanced data preparation and automation awareness.
- Understand the transition from model development to deployment and monitoring.
- Gain exposure to RapidMiner AI Hub configuration, management, and enterprise-level operations.

Week-wise Structure — Part 1

Week 1

Applications & Use Cases Professional

identify business problems suitable for AI and machine learning.

Week 2

Data Engineering Professional

access, load, transform, and calculate data.

Week 3

Machine Learning Professional

build foundational machine-learning skills.

Week 4

Data Preparation Master

develop advanced data handling and automation awareness.

Progression: problem framing → data foundation → ML fundamentals → advanced preparation.

Week-wise Structure — Part 2

Week 5

Machine Learning Master
learn advanced machine-learning techniques.

Week 6

Applications & Use Cases Master
deploy and monitor ML models.

Week 7

Platform Administration Master
configure and manage RapidMiner AI Hub.

Week 8

Platform Administration Master
understand enterprise-level platform operations.

Final — Credential Validation / Internship Grade Point Assessment through the Final Assessment Test.

Technologies & Tools Used

- RapidMiner AI Hub — named AI-platform environment for configuration and management learning.
- Data engineering tools and workflows — used for accessing, loading, transforming, and calculating data.
- Machine-learning tools and libraries — supported foundational and advanced ML learning; no specific external library names are claimed.
- Data preparation and automation capabilities — focused on advanced, repeatable preparation of analytical data.
- Visualization and analytical presentation — treated as a supporting capability; no specific visualization product is claimed.
- Virtual learning platform — enabled structured access to modules and assessments in virtual mode.

System Architecture

Logical learning architecture — not a claim about a specific deployed software system.

Methodology

- Week-wise structured learning plan with a defined competency focus for each module.
- Module-based learning progressing from applications and use cases to platform administration.
- Hands-on practice in data access, transformation, machine learning, data preparation, and platform administration.
- Weekly assessments provided regular checkpoints for understanding and progress.
- Project documentation consolidated the internship scope, methods, tools, and learning outcomes.
- Final Assessment Test supported credential validation and internship grade-point assessment.

Key Learnings

- End-to-end understanding of the data-science lifecycle from problem identification to platform operation.
- Ability to recognize business problems that may be suitable for AI and machine learning.
- Understanding of data access, loading, transformation, calculation, and advanced preparation.
- Stronger foundation in both basic and advanced machine-learning concepts.
- Awareness of deployment and monitoring as essential parts of the ML lifecycle.
- Exposure to RapidMiner AI Hub configuration, management, and enterprise-level operations.

Expected Outcomes

- Integrated understanding of the data-science lifecycle and its major stages.
- Improved proficiency and familiarity with RapidMiner AI Hub in the context of platform administration.
- Greater awareness of deployment and monitoring after model development.
- Improved ability to connect academic computer-science concepts with structured industry-oriented workflows.
- Enhanced readiness and employability for future academic projects, internships, and entry-level data-science or ML responsibilities.
- Successful completion of the internship and credential validation, including the Virtual Internship Certificate with Grade O (Outstanding).

Certificate & Internship Documentation

Offer Letter

Internship Offer Letter

Student Name : Kushagra Pratap Singh
Stream : B.Tech
Branch : B.Tech(Computer Science and Engineering)
Institute Name : IILM University, Greater Noida
Internship Domain : Siemens Data Science Master
Internship Duration : June 2026 - August 2026
AICTE Student ID : STU6a0dfd7bdb6161779301755

We are pleased to inform you that you have been selected for the 8-Week AICTE – EduSkills Virtual Internship Program.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

Certificate details

- Virtual Internship Certificate confirms successful completion of the eight-week Data Science Master Virtual Internship.
- Certificate ID: 4d1eb79183bf19bf6a43.
- Student ID: STU6a0dfd7bdb6161779301755.
- Grade: O (Outstanding).

Internship documentation

- Offer Letter Ref. No.: C17Y2026M091500473
- Internship Domain: Siemens Data Science Master
- Duration: June 2026 – August 2026

Selection for the 8-week AICTE–EduSkills Virtual Internship Program.

Conclusion

- Completed an 8-week structured virtual learning experience from June to August 2026.
- Covered the data-science lifecycle from business use cases and data engineering to ML, deployment, monitoring, and platform administration.
- Gained exposure to RapidMiner AI Hub and enterprise-oriented AI workflow concepts.
- Connected academic Computer Science and Engineering learning with an industry-oriented progression.
- The internship strengthened readiness for future academic projects, internships, and entry-level data-science or ML responsibilities.

THANK YOU

Data Science Master Virtual Internship
